Professional Summary

Software Engineer with 6+ years of experience in developing backend systems, REST APIs, microservices, and cloud applications using Python.

Solid experience with FastAPI, Flask, Django, PostgreSQL, AWS, and Google Cloud Platform, working on projects across fintech, e-commerce, enterprise integrations, and digital customer service platforms.

Strong background in software architecture, integration development, serverless computing, process automation, CI/CD, and building scalable and resilient applications.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, PHP

Backend: FastAPI, Flask, Django, REST APIs, Microservices, Integrations, LangGraph, LangChain, Software Architecture

Cloud & DevOps: AWS, AWS Lambda, API Gateway, S3, GCP, Cloud Run, Cloud Functions, Pub/Sub, IAM, GitLab CI/CD, GitHub Actions, Docker

Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase Realtime Database

Frontend: ReactJS, Redux, HTML, CSS, Bootstrap

Software Quality: Pytest, Unit Testing, Integration Testing, Code Review

Tools: Git, Linux

Professional Experience

Software Engineer

KWAN | Feb/2026 – Nov/2026

- Responsible for full-stack architecture, feature development, and code refactoring within an AI-driven product environment;
- Joined during a key product restructuring phase, conducting technical spikes to validate architectural decisions and participating actively in planning and system design;
- Executed both evolutionary maintenance—building new features, integrating new clients, and expanding LLM capabilities—and corrective maintenance/refactoring;
- Designed and built cloud infrastructure using AWS services (AWS Lambda, API Gateway, S3, IAM, Secrets Manager, CloudWatch) and Terraform;
- Designed and implemented the AWS AppSync communication flow to enable real-time messaging between application components;
- Integrated Anthropic Claude and OpenAI LLMs, utilizing LangChain and LangGraph to orchestrate complex LLM workflows;
- Implemented token-by-token streaming of LLM responses to provide users with real-time visibility into model reasoning;
- Maintained and evolved a natural-language-to-SQL chatbot, developing automated tests with Pytest to ensure reliability and correctness;
- Developed user interfaces and reusable frontend components using Angular and BMW's DS-Density CSS design system;
- Authored technical documentation, conducted legacy codebase investigations, and performed code reviews in an Agile/Sprint-based environment;
- Collaborated closely with international cross-functional teams, including developers, QA engineers, and DevOps specialists.

Technologies: Python, FastAPI, Terraform, S3, AWS IAM, Secret Manager, AppSync, and CloudWatch

Software Engineer

Compass UOL | Nov/2025 – Jan/2026

- Developed and deployed scalable, high-availability RESTful APIs using Python frameworks such as FastAPI and Flask, ensuring clean architecture and high performance.
- Provided direct support for critical backend infrastructure for enterprise clients, including Itaú, troubleshooting complex issues, identifying root causes, and implementing rapid solutions to maximize system availability and operational reliability.
- Designed and configured real-time monitoring dashboards using Grafana to track system performance, identify infrastructure bottlenecks, and proactively resolve application issues before they impacted end users.
- Provisioned, automated, and managed cloud environments, leveraging Infrastructure as Code (IaC) practices to ensure efficient deployment pipelines and consistency across environments.

Technologies: Python, FastAPI, Flask, PostgreSQL, AWS, Terraform

Software Engineer

Blips | Sep/2024 – Jun/2025

- Evolved and maintained Python-based monolithic applications and microservices.
- Developed automated tests using Pytest.
- Managed infrastructure on Google Cloud Platform.
- Managed CI/CD pipelines and provided support for production environments.

Technologies: Python, Flask, MongoDB, GCP, GitLab CI/CD, Pytest

Software Engineer

Digiall | Jan/2023 – Sep/2024

- Developed APIs and microservices for enterprise integrations.
- Processed large volumes of data in REST, JSON, and XML formats.
- Implemented serverless solutions using AWS.
- Participated in code reviews, automated testing, and the evolution of CI/CD processes.

Technologies: Python, FastAPI, PostgreSQL, AWS Lambda, API Gateway, S3

Software Engineer

Frotacard | Jun/2021 – Dec/2022

- Maintained and implemented features in APIs and microservices.
- Developed infrastructure using Google Cloud Platform services.
- Automated deployment, monitoring, and continuous integration processes.

Technologies: Python, Flask, GCP, Cloud Run, Cloud Functions, Pub/Sub

Software Engineer

Expandr | Jul/2020 – Aug/2021

- Developed an e-commerce platform from conception to production.
- Implemented financial integrations and payment automations.
- Defined solution architecture and technical requirements.

Technologies: Python, Django, ReactJS, PostgreSQL

Software Engineer

Retake | Jun/2019 – Jan/2020

- Developed and maintained a system focused on higher education institutions.

Technologies: PHP, Zend Framework 3

Freelance Backend Developer

Apr/2019 – May/2019

- Developed features using Django.
- Built crawlers and automations for data collection.
- Maintained legal tech systems.

Technologies: Python, Django, Web Scraping

Education

Technologist Degree in Systems Analysis and Development

Federal Institute of Piauí (IFPI)
2016 – 2020
